

Operations Management *Simplified.*

Transform your menu into a revenue-generating machine with data-driven insights for rapid results.

Quick Onboarding & Easy Maintenance:

Quickly onboard by uploading invoices to automate food cost calculations and integrate seamlessly into our system. Replace complex spreadsheets with real-time plate costs and streamlined menu pricing, ensuring simple ongoing management and maximum profitability.

Food Cost Management Fast-Track:

Save 80% of the time you used to spend on invoice management and automate the entire lifecycle to quickly boost profits; snap a photo, upload, and watch as your items are instantly cataloged, empowering you to manage food costs like a pro.

Unparalleled Versatility:

Customizable, adaptable, and scalable – our food cost management software integrates seamlessly with existing systems and adapts to various business models, standardizing key metrics and reporting across all levels of operations.

Why Back Office Food Cost Management

Inventory

Category	Total
Alcohol	\$12,935.65
Bottled Beer	\$901.16
Draft Beer	\$5,702.35
Wine	\$9,332.15
Food	\$5,720.21
Proteins-Meat	\$800.55
Proteins-Seafood	\$2,193.15
Dry Goods	\$1,115.90
Bread	\$87.42
Vendor Prepared Items	\$178.92
Non-Alcoholic Beverages	\$404.66
Produce	\$423.82

Automated COGS

Automated COGS reporting provides accurate, timely data for inventory, pricing, and menu decisions. Consistent reporting across locations lets you confidently compare and optimize performance.

Real-Time Recipe Costing

Easily create prep recipes and track weekly plate cost trends with real-time ingredient updates. Auto-mapped ingredients ensure flexibility for substitutions, while clean, normalized data simplifies menu profitability management.

Simplified Inventory Management

Simplify inventory with mobile shelf-to-sheet tracking and accurate COGS calculations. Compare actual vs. theoretical usage, visualize menu contributions, and streamline orders using historical data insights.

Easy Invoice Capture

No more manual data entry! Snap a photo of invoices, and our tech instantly updates recipes, inventory, and reports. Automatically import vendor data and securely store invoices for easy access.
